

# Cost Management Principles for Capital Projects

Learn how to keep your projects on-time, on-budget, and on-quality

Gain critical insights and experience best practices for effectively handling cost issues for your capital projects. This foundational course sets the groundwork for sound cost management principles within high profile capital projects. It takes you through all the lifecycle phases, discussing the various pitfalls, unraveling the terminology, and instilling best practices. Colonnade's interactive format allows you to apply what you are learning in real-life scenarios. You'll break into teams, analyze and work through cost scenarios from the concept phase through post-construction.

## SAMPLE TOPICS

### Terminology

"Allowance," "budget," "contingency," and many more. Learn the "ABCs" of cost management by starting with the basics.

### Project Challenges

Understand common project challenges and pitfalls within each phase so you can actively avoid them and plan around them from the start.

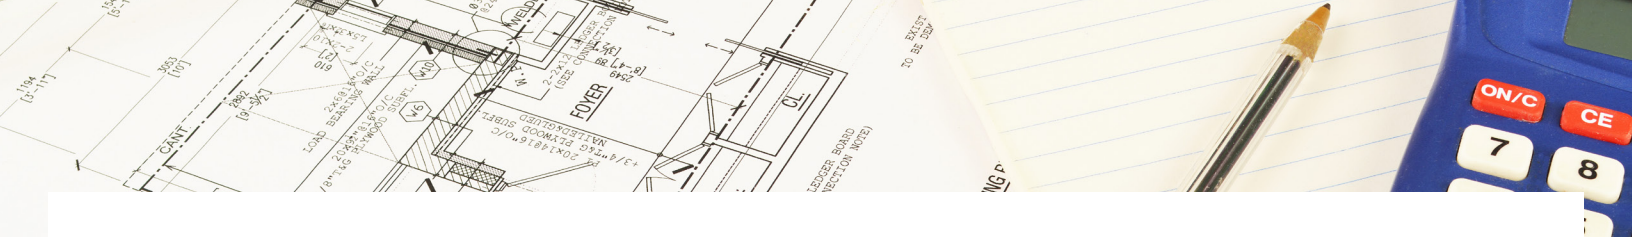

## COLONNADE CURRICULUM

Expert-led classes covering the most powerful concepts for managing and operating the built environment

## MORE SAMPLE TOPICS

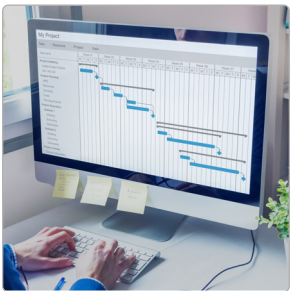

### 5 Lifecycle Phases

We'll walk you through all five phases of capital projects: concept, design, pre-construction, construction, and post-construction and show you proven cost management techniques.

### Risks and Contingencies

Understand risk identification and measurement and how to properly plan for contingencies and allowances to keep your project on track.

### Picking the Right Project Tools

Discuss which tools you should use to enable a successful project and ensure you have the correct data to identify lessons learned effectively.

### Action Plan

Review what you learned and identify real-life next steps for your organization.

## COMMON TO ALL COURSES

### Colonnade Course Kit

A few days before your course, we will drop ship a collection of goodies to help with class exercises and keep you energized.

### Duration

2 four-hour sessions over two consecutive days (8 hours total). In these jam-packed sessions time doesn't crawl by, it rockets past!

### Frequency

Each course runs 2-3 times a month, at variety of times, so that you can find one that fits your time zone.

### Prerequisites

You'll need a computer and internet connection, as well as a way to share audio and video (typically your computer or smartphone).

### Credits

Each course qualifies as 8 hours of Project Management Professional (PMP®) continuing education credits.

### Takeaway

You'll leave class with the valuable knowledge and skills we covered throughout the course and the opportunity to make new business contacts with fellow students and instructors. Use our PDF filled with the topics, exercises, and notes covered in class to serve as an ongoing reference.
