

# Implementing BIM for Owners

*Organize and use building information to manage your organization's physical environment more effectively*

While the construction industry has embraced Building Information Modelling (BIM), building owners have been slow to do so. There are good reasons for this slow adoption rate, but it's time for business owners to harness the power of BIM. In this class, you'll learn how owners can set up lean BIM to better manage their real estate and facilities portfolio while improving maintenance and reducing cost. Then you'll put what you learned to the test by interpreting data using a 3D drawing pen.

## SAMPLE TOPICS

### **What is BIM for Construction?**

Understand how construction teams use 2D, 3D, 4D, and 5D to solve design problems before they become issues on the construction site.

### **How is BIM for Construction Different from BIM for Owners?**

Maintaining data comes at a cost. Learn how to identify a lean data set designed to address a real estate owner's business needs.

## COLONNADE CURRICULUM

Expert-led classes covering the most powerful concepts for managing and operating the built environment

## REGISTRATION

Select a time and purchase at [enstoa.com/products/colonnade](https://enstoa.com/products/colonnade)

## MORE SAMPLE TOPICS

### **Financial Aspects of Facility and Real Estate Asset Management**

Owners have large amounts of asset investments in their built environment. We will explore the economics of managing facilities and on how to make a business case for proper asset management.

### **Data Strategy**

Learn how to identify and set up categorization schemas to effectively and efficiently translate your building's structures into meaningful information.

### **Organizing for Success**

Understand what skills and team structures are needed to ensure your owner-centric building information is properly maintained on an ongoing basis.

### **Leveraging data to drive decisions**

See examples of how data is used to effectively drive management decisions in facilities management.

## COMMON TO ALL COURSES

### **Credits**

Each course qualifies as 8 hours of Project Management Professional (PMP®) continuing education credits.

### **Colonnade Course Kit**

A few days before your course, we will ship a collection of goodies to help with class exercises and keep you energized.

### **Duration**

2 four-hour sessions over two consecutive days (8 hours total). In these jam-packed sessions time doesn't crawl by, it rockets past!

### **Frequency**

Each course runs 2-3 times a month, at a variety of times, so that you can find one that fits your time zone.

### **Prerequisites**

You'll need a computer and internet connection, as well as a way to share audio and video (typically your computer or smartphone).

### **Takeaway**

You'll leave class with the valuable knowledge and skills we covered throughout the course and the opportunity to make new business contacts with fellow students and instructors. Use our PDF filled with the topics, exercises, and notes covered in class to serve as an ongoing reference.
