

# Starfish Spaces

Powerful, intuitive space management for healthcare facility owners

Your organization has space. And a lot of it. More pressing, you have countless stakeholders continually requesting to measure, assess, utilize, sell, subdivide or modify all those buildings, floors, zones and rooms. Chances are you have space documentation that runs the gamut from yellowed parchment to augmented-reality-enhanced BIM models. Keeping all of that space information accurate, normalized and accessible is not easy. Fortunately, Enstoa has the right tool for that. Our healthcare-industry-optimized Space Management software enables you to comprehensively manage spaces data, files and teams.

Seamless workflows for editing in Revit, sharing BIM models, drawing simplification, exporting and reporting.

## Digital

Make your space information accessible and complete.

## Right-sized

Capitalize on BIM technology without getting bogged down.

## Efficient

Reduced time to update master plans and metadata.

## Collaborative

Improved interdepartmental utilization of space data.
