

Digital Transformation Strategy

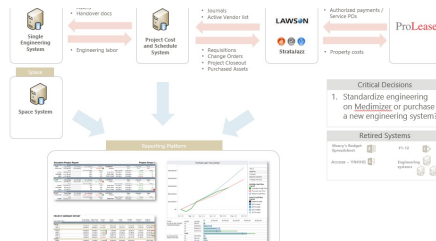

Climb the journey to digital with a trusted guide

We see a world in which all capital projects achieve maximum return on investment. In which data and analytics inform crucial decisions about where and how to spend budget. In which the risks and challenges inherent to capital intensive projects are reduced through an evidence-based approach. This can only be achieved through digital transformation. For over 14 years Enstoa has guided America's leading hospitals through digital transformation journeys—implementing systems for project portfolio management, preventative and reactive work orders, and space management. We are the only company that maintains an exclusive focus on accelerated digital transformation for the built environment.

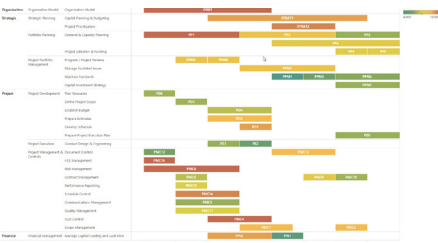

SAMPLE OUTPUTS

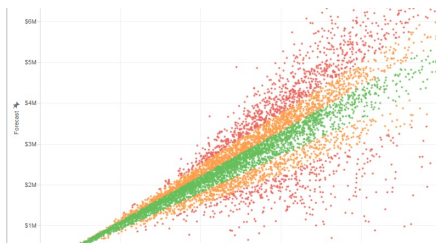

Value-based business case

Future state system architecture

Digital transformation roadmap

Advanced analytics

Optimize capital plans

Locate permanent savings, keeping dollars on the table.

Achieve occupancy dates

Stop ROI bleed from late and blocking projects.

Forecast cash-flow

Prevent erratic, rushed spending and shrink large finance buffers.

Improve staff efficiency

Reduce hiring needs and time spent on manual administrative processes.
