# Starfish **Assets**

*Created by health care experts. Used by experts in health care.*

Starfish Assets allows you to rest easy. Your Inspection, Testing, and Maintenance (ITM) task plans are customized to your specific site locations and update on autopilot as changes in standards arise.
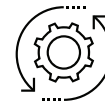

Your ITMs are created and reviewed by experienced health care subject matter experts, verified to be up to date from a regulatory perspective, and customized within your Computerized Maintenance Management System (CMMS) or Enterprise Asset Management (EAM) system to exact specifications for each of your site locations. We do the rest: we monitor changes to codes and standards, update your legacy ITMs, and seamlessly sync the information within your existing CMMS/EAM so your Facilities personnel don't miss a beat.

Starfish Assets is the subscription-based model that allows for all of this. For one easy-to-understand price, you'll sleep like a baby at night.

## Ensure quality
Rest assured knowing your ITM task plans will always contain up-to-date info

## Enable compliance
Changes to regulatory codes & standards? You got it – automatically

## Eliminate headaches
Your teams will work from the right plans and schedules, across all your site locations

## Optimize operations
Inefficient operations and maintenance activities are a thing of the past
