

Learn about Enstoa

An outstanding reputation in digital transformation

For over 15 years Enstoa has guided clients from a broad range of industries through digital transformation journeys—implementing systems for project portfolio management, preventative and reactive work orders, and space management. These integrated enterprise systems enable your staff to work more efficiently and focus their time on high-value activities, optimize your use of capital, extract the most value from your assets, and improve both client and staff satisfaction. We're out to develop the products and solutions that drive the greatest value and generate the highest return on investment for the built environment.
